Air Qualification Checklist

Customer _____

Date _____

_____ Will you use a diesel or electric compressor?

_____ Is there an after cooler dryer attached or will you need to rent one?

_____ Is the dryer working properly and regularly serviced?

_____ What is the CFM of the compressor?

_____ What is the HP of the compressor if CFM is not known? (4 CFM per HP is standard)

_____ What is the estimation of available CFM at the time you will be blasting after other consumption?

_____ What is the psi available?

_____ What is the size of the air line near the area you will be blasting?

_____ Is there a ball valve and/or junction near the area you will be blasting to access the air?

_____ Do you have NPT, JIC, or Claw (Chicago) couplings on your air lines?

_____ What is the approximate distance the air line will travel from the compressor to the blasting area?

_____ How much hose will you need to go from the nearest useable drop to the blasting machine?
