HALLOWEEN DRY ICE SAFETY

from Continental Carbonic Products, Inc.

Do Not TOUCH

Dry ice is extremely cold (-109° F/-78.5° C) and is a skin and eye irritant. Avoid contact with skin, mouth, eyes and clothing. Dry ice will cause severe burns. Always use gloves when handling dry ice.

Do Not EAT

Dry ice is harmful if eaten or swallowed. If ingested, seek medical help immediately.

COULD CAUSE SUFFOCATION

Dry ice changes to CO₂ gas as it sublimates, causing a lack of oxygen. Only use dry ice in open or well-ventilated areas. Do not store in confined spaces such as vehicles and never store near an area where people sleep as suffocation could occur.

Do Not PLACE IN AIRTIGHT CONTAINERS

Airtight containers may explode as dry ice converts to CO₂ gas.

KEEP OUT OF REACH OF CHILDREN!

Halloween Recipes
