

PHOENIX: PHX-200

Classic technology. High pressure pneumatic offering.

The Phoenix PHX-200 is the ultimate heavy duty, high pressure dry ice blasting solution. As the upgrade to the Phoenix PHX-150, this is a great high pressure all pneumatic option for the contractor grade user. The PHX-200 is a “workhorse” that can tackle the most demanding applications due to its increased air capability and adjustable air volume of dry ice usage.

With a 100 pound dry ice hopper and minimal required maintenance this is the model of choice for major fire restoration projects or heavy duty plant applications. In addition, this model has enhanced safety features not found on the PHX-150 model. The PHX-200 includes a universal high low blast hose, upgraded gauges and emergency stop button. The PHX-200 also has higher rated plumbing and regulators and an actuated ball valve to control blast flow. If you are looking for a high pressure, heavy duty blasting machine, look no further than the PHX-200.

FEATURES

- Pneumatic dry ice blasting machine
- Rugged and easy to maneuver
- Ergonomic and easy-to-operate
- Optional high and low pressure hose
- Ugraded gauges and emergency stop button
- Vibrate on demand
- Safe operation and easy to maintain

SPECIFICATIONS

- Dimensions inch/cm
- Length: 20 / 51
- Width: 18 / 47
- Height: 47 / 120
- Weight 165 lbs.
- Hopper Capacity: 100 lbs.
- Dry Ice Consumption: 0.5-5 lbs./min, adjustable
- Supply Air Pressure: 70 - 250 psi (4.8 - 17.2 bar)
- Air Consumption Range: 120 CFM - 250 CFM at 100 psi; depending on nozzle combination
- Blast Pressure Range: 50 psi - 250 psi (2.8-17.2 bar)
- Inlet Air Temperature: 140° F (60° C) maximum
- Inlet Air Dew Point: Should not exceed +40° F (+4.4° C)
- Inlet Air Connection: 1" FNPT
- Hose: Blasting Hose, 1"/2.5 cm standard, single hose system
- Noise: Noise level 60-120 dB (A) depending on blasting pressure, nozzle combination, material surface and other factors.

DRY ICE PURCHASING

To purchase dry ice pellets contact us at 1-800-DRY-ICE2 (379-4232).

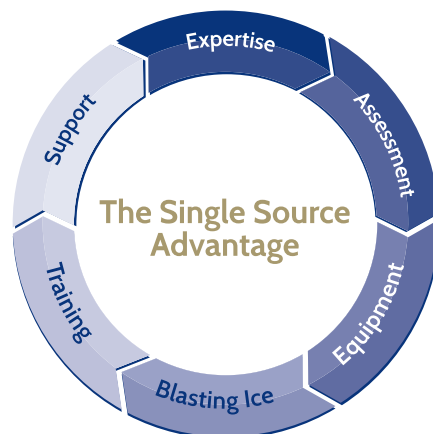

MACHINE PURCHASE AND RENTAL OPTIONS

We maintain a rental fleet of blasting equipment. We will rent our equipment on a weekly or monthly basis. Ask us about rental equity towards the purchase of a dry ice blasting machine. Visit www.continentalcarbonic.com and fill out an inquiry form online.
